ADITYA DIUNDI

Product Designer

aditya15124@iiitd.ac.in | 8510860382 | Portfolio

SUMMARY

Product Designer and Systems Thinker with 3+ years of experience designing and shipping user-centric digital products across startups, social impact, and freelance client work. Skilled at leading cross-functional initiatives, crafting intuitive user experiences, and applying product thinking in ambiguous, high-impact settings. Immediately available.

EXPERIENCE

Freelance Product Designer — Invenix & Independent Clients *Oct 2025 – Present*

- Designed end-to-end website and product experiences for Invenix and other clients across web and mobile platforms
- Owned projects independently from discovery through delivery — user research, wireframing, UI design, and handoff
- Delivered live, production-shipped design work for multiple clients, balancing brand identity with usability

Product & Program Design — Project Potential x India Fellow *Feb 2024 – Oct 2025*

- Built a real-time, no-code attendance tracker with live location validation using Google Sheets, App Script, and HERE API
- Co-authored a Youth Resource Manual and designed group activities and youth club layouts to foster leadership and civic participation
- Led visual design for program reports, decks, and communication materials shared with partners and funders
- Conducted district-wide data analysis on youth aspirations using Power BI to inform program strategy
- Facilitated design thinking workshops and participatory co-creation with rural youth and stakeholders

Product Designer — Mosaic Wellness *Jun 2022 – Dec 2022*

- Led UX for habit tracker on ManMatters app; onboarded 100+ users in week one, with 22 regular weekly users
- Increased tracker-to-product purchase conversion by 12% through nudge flows and simplified CTA redesigns
- Coordinated with PMs and engineers to define delivery TATs and feature prioritization
- Also contributed to BeBodywise and LittleJoys with consistent UX delivery across platforms

Product Designer — MFine *Nov 2021 – May 2022*

- Designed core patient-side app flows used by over 100K daily users
- Developed corporate onboarding and wallet management tools for B2B expansion
- Led UX revamp of user-facing claim settlement flow, reducing support tickets and enhancing satisfaction

Product Designer — Gemini Solutions *Sep 2020 – May 2021*

- Designed internal employee management tools and an in-house social media platform
- Collaborated on FinTech projects, leading redesigns to enhance usability and feature adoption
- Delivered quick-turnaround design systems and interaction flows for multiple client-facing tools

INTERNSHIPS

Visual Design Intern — GeeksforGeeks

- Managed visual identity for YouTube and contest channels; increased content views and engagement
- Designed graphics and digital assets for social media and marketing campaigns

Tech Intern & Graphic Designer — CampK12

- Taught app development and coding to school students during summer tech camps
- Created infographics and course content; upsold next-level modules to parents via demos

EDUCATION

B.Tech in Electronics and Communication Engineering — IIIT Delhi *2015 – 2021*
