Summary

Product designer with 4+ years across consumer health, healthtech, social impact, and freelance work, taking products from research to shipped screens. Lifted tracker-to-purchase conversion by 12% on the ManMatters habit tracker and designed patient flows used by 100K+ daily users at MFine. A design engineer who prototypes and ships interactive front ends using AI-assisted development and creative coding. Immediately available.

Skills

Product Design · Design Systems · Interaction Design · Micro-interactions · Prototyping · Information Architecture · User Research · Usability Testing · Design Critique · Workshop Facilitation · Figma · Framer · AI-assisted Frontend Development · Creative Development · Design Engineering · Systems Thinking · HTML/CSS · Python · SQL · Power BI

Work Experience

Freelance Product Designer · Invenix & Independent Clients — 10/2025 - Present

- Designed and shipped live websites and product experiences for Invenix and other clients across web and mobile, balancing brand identity with usability.
- Owned projects end to end, from user research and wireframes to UI design and developer handoff.

Product & Program Designer · Project Potential x India Fellow — 02/2024 - 10/2025

- Built a real-time, no-code attendance tracker with live location validation using Google Sheets, Apps Script, and the HERE API.
- Analyzed district-wide youth aspiration data in Power BI to shape program strategy.
- Co-authored a Youth Resource Manual and facilitated design thinking workshops with rural youth and stakeholders.
- Led visual design for program reports and decks shared with partners and funders.

Product Designer · Mosaic Wellness (ManMatters) — 06/2022 - 12/2022

- Led UX for the ManMatters habit tracker, onboarding 100+ users in week one with 22 regular weekly users.
- Lifted tracker-to-purchase conversion by 12% through nudge flows and simplified CTA redesigns.
- Modeled repeat-purchase revenue of about ₹2.4L in 6 months and ₹3.7L in 12 months per 100 tracker-driven buyers (minoxidil ₹799, biotin combo ₹1,547).
- Aligned with PMs and engineers on delivery timelines and prioritization; also contributed to BeBodywise and LittleJoys.

Product Designer · MFine — 11/2021 - 05/2022

- Designed core patient app flows used by 100K+ daily users.
- Revamped the claim settlement flow, reducing support tickets and improving satisfaction.
- Built corporate onboarding and wallet tools for B2B expansion.
- Sized the online test upsell at a projected ₹1.3Cr in 6 months and ₹2.5Cr in 12 months, assuming 0.1% of daily users book a ₹700 test.

Product Designer · Gemini Solutions — 09/2020 - 05/2021

- Designed internal employee management tools and an in-house social media platform.
- Led FinTech redesigns that improved usability and feature adoption, and delivered quick-turnaround design systems for client tools.

Projects

- **Pixel Art Generator** · Framer: built from scratch as a code component with a five-layer canvas, Bresenham line drawing, flood fill, undo/redo, and layered PNG export.
- **JANEVAL** · Web: designed and built a double-blind benchmark site for image models on Indian public-health scenarios, with 120 verified pairwise votes from 12 evaluators.

Internships

- **Visual Design Intern** · GeeksforGeeks: managed visual identity for YouTube and contest channels, growing views and engagement.
- **Tech Intern & Graphic Designer** · CampK12: taught app development to school students and created course content.

Education

IIIT Delhi · B.Tech in Electronics and Communication Engineering — 2015 - 2021
